INTRODUCTION**

ABOUT US

Trelawny is an independent manufacturer of pneumatic tools and surface preparation equipment operating from its headquarters in the engineering heart of the UK in Leamington Spa. For over 60 years Trelawny has been offering a range of equipment for the preparation of concrete, steel and stone in industries which include:

- Construction
- Floor preparation
- Utility contracting
- Marine and offshore (oil and shore)
- Nuclear decommissioning (remediation)
- Restoration, refurbishment and demolition

Our products are sold worldwide through a global network of quality approved stockists and distributors. The latest techniques of low vibration equipment and dust free working are offered to ensure that job sites are maintained to the highest professional standard.

Our aim is to continue to develop our product offering to satisfy the demand and needs of our customers. With this, we continually seek quality stockists and distributors worldwide who are interested to work with a reputable growing brand and offer the service, back up and know-how our customers require.

WHAT IS SURFACE PREPARATION?

Prior to the application of any coatings or further treatment, surface preparation is the process of treating the surface, either mechanically or chemically. The aim is to increase the surface's attraction to coatings and is crucial to their success.

Definitions of surface preparation

"The process of treating a surface in order to increase its attraction to coatings. Surface preparation can be mechanical or chemical and is crucial to the success of a coating."

"Correct surface preparation is key, prior to applying any coating or covering to a concrete substrate."

"Surface preparation is considered to be the most important step of any flooring application. Improper surface preparation could turn what seems to be a simple process into a lengthy difficult repair."

WHAT METHODS CAN BE USED IN SURFACE PREPARATION?

Scabbling

Using compressed air to hammer pistons into the concrete, leaving a rough surface

Scraping

Using a rapid, hammering action to increase production on all types of floor covering removal.

Scarifying

Using loosely mounted cutters to remove material by a chipping action, with operator to controlled depth of cut. Various styles can be achieved with interchangeable assemblies for light or heavy stock removal.

Grinding

Using horizontally rotating discs to level, smooth or clean concrete. They use a quick release diamond tooling system and provide a smoother finish than scarifiers and scabblers.

TECHNICAL FEATURES AND INNOVATION

Low Vibration

As those within the industry will be aware, permanent injury can result to the hands and arms from the vibration caused by operating powered equipment. Occasional exposure is unlikely to cause ill health, however regular and frequent exposure to Hand Arm Vibration (HAVS) needs to be managed in order to protect operators.

As a quality and responsible manufacturer, health and safety issues such as these, are a significant factor in Trelawny's design considerations for each tool and machine. We have developed a particular range of reduced vibration pneumatic hand tools, under our trademark Vibro-Lo™, in order to help protect the user from injury.

Furthermore, we fit our machines with a dead man's handle device and ensure that motor controls have "zero volt and thermal overload protection". Due to these safety precautions, our equipment counteracts the hazards of HAVS and stands at the forefront of the market with world leading designs of quality, efficiency and safety.

For further information on HAVS, please visit www.hse.gov.uk/vibration.

Dust Control

The nature of our tools and machines is to remove surface coatings and as a consequence, this can create dust in the surrounding atmosphere. In order to combat this, we provide dust shrouds for all of our equipment, which when connected to vacuum dust collectors (also available from Trelawny SPT), enables the collection of dry dust and debris.

Our Tool and Vacuum System (TVS®) range of products has been designed specifically to ensure the recovery of lead based paint, radioactive contaminants and other hazardous and non-hazardous materials from the source of surface preparation equipment and hand tools, which further provides a safe and clean working environment.

Non spark tools

In industries such as nuclear and steel preparation, our tools will often be used to carry out projects in hazardous and flammable environments. For such circumstances, we produce spark resistant copper beryllium needles and cutter heads.

This metal combines high strength with non-magnetic and non-sparking qualities to deliver a safe, yet efficient execution of the task at hand.

ATEX

ATEX (ATMospheres EXplosibles) ATEX is a directive outlining a number of technical and quality objectives that must be complied with to the satisfaction of a third party certification association.

A potentially explosive atmosphere exists when a mixture of air gases, vapours, mists or dusts combine in a way that can ignite under certain operating conditions.

Equipment and protective systems intended for use in potentially explosive atmospheres (ATEX) cover a range of products, including those used on fixed offshore platforms, petrochemical plants, mines and flour mills amongst others.

The ATEX Directive 2014/34/EU covers equipment and protective systems intended for use in potentially explosive atmospheres. The directive defines the essential health and safety requirements and conformity assessment procedures, to be applied before products are placed on the EU market.

Directive 99/92/EC (also known as 'ATEX 137' or the 'ATEX Workplace Directive') refers to the minimum requirements for improving the health and safety protection of workers potentially at risk from explosive atmospheres.

SH RANGE

Low vibration options available

Dust control options available

The SH1 and VL SH1 single head scabblers are the ideal tools for roughing and preparing concrete in small areas such as concrete joints.

The VLSH1 low vibration model helps reduce the risk to operators of vibration related injuries.

The SH3 triple head scabblers are the ideal tools for roughening and preparing concrete in larger areas such as walls and columns.

The optional TVS® vacuum shroud allows the connection of an industrial dust collector for collecting nuisance and hazardous dust for protection of operators and environment.

Safety built in as standard.

FEATURES

- Replaceable tough carbide tipped piston for fast production and long service life
- Side handle on triple models for greater control
- Triple headed models can be used in two configurations, the optional in-line position aiding access to prepare narrow joints.
- Short & in-line models available
- Simple and robust design for low and easy maintenance
- TVS® dust shrouded models available

APPLICATIONS

- Removal of laitance
- Roughening and exposing aggregate
- Preparing joints and cracks
- Removing coatings
- Reduction and levelling

SC RANGE

The SC1 is the most powerful single head scabbler for heavy duty applications.
The flush fitting top cap and replaceable cylinder sleeve make servicing simple and fast.

The SC3 is the most powerful triple head scabbler for heavy duty applications.
The back handle design provides the operator optimum control.

FEATURES

- Single or triple replaceable tough carbide tipped piston for fast production and long service life
- Top handle on SC3 for control
- Reduced vibration single headed model
- Simple and robust design for low and easy maintenance

APPLICATIONS

- Removal of laitance
- Roughening and exposing aggregate
- Preparing joints and cracks
- Removing coatings
- Reduction and levelling

VL LRS55

POLE SCABBLER

Low vibration options available

The VL LRS55 is a powerful long reach scabbler for vertically preparing hard to reach areas.

At 1.3 metres in length it allows scabbling below the reinforcement bar.

The powerful blow quickly removes concrete without damaging the underlying substrate.

Vibro-Lo™ low vibration system fitted as standard, helping to reduce risks to operators of vibration related injuries.

Safety built in as standard.

FEATURES

- Replaceable pin fit carbide tipped scabbling heads
- Long handle for extended reach into inaccessible areas
- Angled air inlet to direct hose away from operator
- Hand guard to protect operator

APPLICATIONS

- Heavy scabbling of hard to access areas such as below re-inforcement bars and between shuttering
- Scabbling of corners, edges and joints
- Fast removal of material
- Aggressive keying without damaging the substrate

Note: Can be converted to a pole compactor by changing the scabbler head with a tamper foot.

VL LRS55

POLE TAMPER

Low vibration options available

The VL LRS55 pole tamper is a unique tool specifically designed for small area reinstatement tasks.

Developed in association with utility companies and conforming with the New Roads and Streets Works Act (UK), it is perfect for water, electric and gas companies.

The unique Vibro-Lo™ vibration dampening system not only helps to protect the operator from vibration related injury it also ensures maximum control when working in tight, narrow trenches and around delicate utilities.

Safety built in as standard.

FEATURES

- Replaceable pin fit compactor feet
- Unique vibration dampening system
- Angled air inlet to direct hose away from operator
- Hand guard to protect operator
- Secondary handle for improved controllability
- Lightweight and compact

APPLICATIONS

- Small reinstatement around water meters and stopcocks
- Narrow trench work carried out by cable companies
- Compaction of tarmacadam or asphalt
- Compacting close to walls and street fittings
- Back fill small areas
- HAUC Compliant compacts up to 2.19 tonnes/m³
- Suitable for pathways & highway re-instatement

Note: Can be converted to a pole scabbler by changing the compactor foot with a scabbler head.

LPS55

POLE SCABBLER

The LPS55 is a powerful long reach scabbler for vertically preparing hard to reach areas.

At 14 metres in length it allows scabbling below the reinforcement bar.

The powerful blows quickly remove concrete without damaging the underlying substrate.

FEATURES

- Replaceable pin fit carbide tipped scabbling heads
- Long handle for extended reach into inaccessible areas
- Angled air inlet to direct hose away from operator
- Hand guard to protect operator

APPLICATIONS

- Heavy scabbling of hard to access areas such as below re-inforcement bars and between shuttering
- Scabbling of corners, edges and joints
- Fast removal of material
- Aggressive keying without damaging the substrate

MHS5

5 HEAD CONCRETE FLOOR SCABBLER

Productivity:
Ave 40 Square
Meters per
hour at 6mm
per pass

**Requires
compressor:**
120cfm - 57lps
capable

Dust Shroud as Standard

The MHS5 is the heavy duty floor scabbler of choice for fast reduction of levels.

5 x 50mm (2") carbide tipped heads give 1300 powerful blows each producing a heavy key for application of fresh concrete and overlays.

Integrated TVS® vacuum shroud allows the connection of an industrial dust collector for collecting nuisance and hazardous dust.

Production rates in excess of 40 m² per hour.

FEATURES

- 5 replaceable carbide tipped pin fit scabbling heads
- Height adjustable handle for operator comfort
- Heavy body gives control, performance and long service life
- Efficient design gives 45% lower air consumption than the main competition without sacrificing performance
- Fitted with Trelawny Vibro-Lo™ vibration damping system for operator comfort

APPLICATIONS

- Fast reduction of levels
- Correct preparation for new applications of concrete
- Removal of heavy coatings
- Removal of contaminated materials and coatings with safe containment via standard fit Trelawny TVS® vacuum shroud

Laitance Removal

Fast Removal of Concrete

Reducing High Spots

MHS11

11 HEAD CONCRETE FLOOR SCABBLER

Productivity:
Ave 30 Square
Meters per
hour at 5mm
per pass

**Requires
compressor:**
26lps - 55cfm
capable

Low vibration options available

Dust Shroud as Standard

Developed in conjunction with the
'CITB - Construction Industry Training Board'.

The MHS11 introduces a new concept in
pneumatic floor scabblers. Using smaller heads
with a 70% increase in BPM (Blows Per Minute)
and a 30% reduction in air consumption, the
MHS11 maximises productivity, efficiency, value
and ergonomics, without compromise.

It is the perfect machine for fast removal of
laitance, level reduction and profiling for new
concrete and thick screeds and sealants.

Production rates in excess 30 m² per hour.

Safety built in as standard.

FEATURES

- 11 replaceable carbide tipped scabbling heads for fast production and long service life
- 4,000 light blows per minute for fast production without damaging the underlying substrate
- Vibro-Lo™ technology for reduced vibration
- Trelawny TVS® shroud system included as standard for protection of operators and surrounding environment

APPLICATIONS

- Removal of laitance, roughening, and reduction of levels
- Aggressive keying without damaging the substrate
- Removal of coatings
- Fast removal of hazardous coatings and contaminated materials with TVS® shroud system.

MHS11 IN USE**

HOW THEY WORK

Scabblers are percussive pneumatic tools (driven by a portable air compressor) using carbide tipped cutting heads that impact the concrete. They operate by pounding a number of tipped cutters down onto the concrete surface in rapid succession. It takes several passes with the machine to achieve the desired depth.

Scabblers are available in a range of sizes from small hand held tools to multi-head floor machines.

Scabblers leave a rough heavy profile.

APPLICATIONS

You would use scabblers to:

- Prepare surfaces for application of fresh concrete, grout, mortars and renders without damaging the substrate
- Reduce concrete levels over 6mm
- Remove very thick coatings
- Remove laitance
- Expose aggregate
- Rectify over poured slabs
- Create a heavy profile where material requires a heavy mechanical key

ATTACHMENT OPTIONS

2 types of cutter heads are available for the Trelawny range of scabblers.

Bush Hammer Heads

Use carbide tips to produce a rough pitted profile exposing aggregate and providing a strong mechanical key for the application of fresh concrete or coatings.

Cruciform Heads

Use carbide tips in cross shape to produce a cutting action leaving a flatter surface profile ideal for fast reduction of material.

HINTS & TIPS

Air tools are potentially dangerous, always ensure tools and machines are kept well maintained, torque settings are adhered to, correct fittings and safety whip checks are used and correct air pressure is maintained.

Correct air pressure should be used to ensure optimum performance of the tool and reduce premature wear and tear.

Allow the tool to do the work, putting excess pressure on the head will not allow the heads to reach their full extension potentially stalling the tool and reducing performance.

Scabblers are the ideal machines for heavy duty preparation of concrete, being fast and aggressive in their application.

TFP200

FLOOR SCARIFIER

Productivity:
Ave 25 Square
Meters per
hour at 3mm
per pass

Dust control options available

The smallest in the TFP range of scarifiers the TFP200 is perfect for small to medium jobs.

The rigid steel chassis ensures a strong, stable machine suitable for accurate surface preparation of concrete and steel surfaces, removing coatings, levelling and texturing.

The TFP200 is also our most popular machine for equipment hire fleets, a versatile range of power options together with simple operation and maintenance makes it the machine of choice for a demanding industry.

FEATURES

- 200mm cutting width
- Easy to use, maintain and manoeuvre
- Precise screw type cutter height adjustment for accurate removal and milling
- Angled dust port allows connection of industrial dust collector giving virtually dust free performance
- Choice of electric, petrol and pneumatic power sources for operation in a wide range of applications
- Rear mounted electrical switchgear utilizing vibration resistant components
- Customizable heavy duty vinyl wrap

APPLICATIONS

- Suitable when manoeuvrability is important
- Removal of hard coatings
- Levelling and removing layers of hard materials such as concrete
- Removing painted lines
- Grooving and texturing concrete
- Removal of coatings and scale from steel surfaces

Levelling

Dust Free

Coating Removal

KEY CONSUMABLES & ACCESSORIES

Image	Part Number	Description
	320.5500	Tungsten Carbide Tipped Cutters For all concrete texturing, scabbling, planing and grooving applications
	320.4140	Spacers Used to create a gap in between cutters 88 required per TCT drum 196 required per grooving drum 72 required per milling drum
	320.3658	Star Cutters For the removal of paint, coatings and laitance. Deck descaling
	320.5120	Beam Cutters For the removal of paint, coatings, laitance, grease, dirt and ice deposits. Deck descaling
	320.5600	Milling Cutters For the removal of thermoplastic road and runway markings, bituminous and rubber deposits.
	320.9620	Wire Brush For general cleaning and removal of light surface rust.

INTRODUCTION**

TFP260

FLOOR SCARIFIER

Productivity:
Ave 35 Square
Meters per
hour at 5mm
per pass

TVS Dust control options available

The TFP260 is a heavy duty machine for medium to large jobs.

Increased weight and power give exceptional performance for a machine in this segment.

Robust chassis construction and a heavy duty double web cutter drum ensure the TFP260 keeps working on the toughest of surface preparation jobs.

The quick lift drum mechanism gives additional control to the operator.

FEATURES

- 250mm cutting width
- Tough 8mm welded steel construction for added weight and strength
- Precise screw type height adjustment with quick lift drum lever for accurate working and operator control
- Angled dust port allows connection of industrial dust collector giving virtually dust free performance
- Rear mounted electrical switchgear utilizing vibration resistant components

APPLICATIONS

- Suitable for medium to large jobs
- Removal of hard coatings
- Levelling and removing layers of hard materials
- Removing painted lines

Reducing Levels on Concrete

Roughening Concrete

Use with A45 Dust Collector

	669.3122	4mm	230v Power Cable 20 metres
	669.3124	4mm	400v Power Cable 20 metres

HOW THEY WORK

Scarifiers, also called surface planers or milling machines, use a drum of multi-tipped cutters (flails) which rotate at high speed, impacting the surface to provide an aggressive "cut" to the surface. You can choose from many different styles of interchangeable cutter assemblies to achieve the profile you need for each job.

The Trelawny TFP Scarifier range all come with an integrated height adjustment for varying depths of cut. The range offers varying sizes from light duty machines to heavy duty hydraulically driven versions. Quick change drum designs on all models allow you to switch or replace cutters in minutes.

A variety of interchangeable cutters and drum setups allow scarifiers to perform a broad range of profiling tasks.

- Removing coatings over 1mm thickness such as screeds, old coatings, adhesives and contaminants.
- Concrete reduction and levelling due to incorrect floor levels.
- Grooving and profiling for non-slip applications such as car parking ramps.
- Provide a textured finish.
- Remove line markings and remove trip hazards.

Most cutters are made of tungsten carbide or hardened steel and come in a range of styles to suit different applications.

You can choose from different diameters and widths, number of cutting teeth, and tip styles (blunt or flat for aggressive removal, sharp for gentler scarifying action, or angled for scraping).

Please see page 26 & 27 for further information on individual cutters and applicable applications.

HINTS & TIPS

Sometimes it's better to do the required cut in two or more passes, taking the level down gradually gives a better, more even finish and more importantly increases the life span of the cutters, shafts and bearings.

Varying the spacing of the cutters helps achieve different finishes – spacing the cutters further apart will create a coarser profile, closer together will give a smoother finish.

Always plane in straight lines, when doing the second pass plane at a right angle to your original pass.

If you require a smoother finish for application of a thin coating consider the use of a Trelawny concrete grinder after scarifying.

**NEW ZERO EMISSION, BATTERY
TFP200 AVAILABLE**

Trelawny SPT have completed extensive trials on the deployment of the Honda eGX battery motor and recharge unit. When used in combination with our famous TFP200 floor planer/scarifier productivity has remained high with the use of two batteries supplied for continuous operation.

This is the ideal replacement for traditional gasoline motor solutions, with a particular focus on indoor use. All consumables and spares are available for the floor machine without modification.

The Trelawny TFP range of floor scarifiers are designed to cover a wide range of applications by simply changing the accessory on the bottom of the machine. The following application chart identifies which accessory to use on your current application...

Key to the guide: ★★★★★ Best method to produce maximum performance or productivity rates for most job applications.

★★★★ Satisfactory performance or productivity rates for most job applications.

★ Non-satisfactory (or less satisfactory) performance productivity rates for most job application.

Preparation Guide	<div><div></div><div></div></div>						
	Heavy Scarifying					Light Scarifying	
Roughing / keying texturing concrete. Removal of laitance excess concrete or asphalt			★★★★		★★		
Removal of paint, dirt build up, & ice deposits from concrete floors	★		★		★★★★		★★
Concrete grooving applications for non slip surfaces		★★★★					
Removal of thermoplastic road, runway markings	★★		★★★★		★		★★
Removal of roofing felts, bituminous & rubber deposits	★★		★★		★★★★		
Removal of heavy rust & scale build up in tanks & deck areas	★★★★				★★		★★
Removal of non-slip paints, epoxies, mastics & rubberised coatings from steel tanks & deck areas	★★				★★★★		★
Removal of paints & coatings from tanks & deck areas	★				★★		★★★★
Bright metal & light rust removal from tanks & deck areas						★★	★★★★
Comments	Best for roughing concrete. Aggressive on heavy corrosion. Least favourite for light duty scale and paint removal.	Ideal for concrete grooving of farmyards, public highways, to create non-slip surfaces.	Removal of plastic road markings without penetrating the surface.		Good for the removal of mastics & rubberised coatings, faster cutter wear due to star points	Best for light paint/ corrosion removal as they minimize the damage to surface substrate.	Best for finish cleaning & polish- ing on steel. Can be used for light concrete deposit. Removal from steel shuttering

GRINDING
& POLISHING

TCG250

250MM SINGLE HEAD GRINDER

Productivity:
Ave 25 Square
Meters per
hour

Low vibration options available

Dust control options available

The TCG250 is a heavy duty single head grinder for levelling and preparation of small to medium areas.

The flexible grinding head ensures maximum contact and usage of the diamond while working over rough surfaces.

A robust design and optimised grinding pressure while maintaining overall compactness together with manoeuvrability make the TCG250 the choice for a wide range of jobs. It is the ideal partner for both specialist contractors and the hire industry.

A flexible range of tooling options complete the perfect package providing a versatile solution to many grinding applications.

FEATURES

- 250mm grinding diameter
- Optimised grinding pressure and speed for high productivity
- Angled dust port for virtually dust free working
- Available with Trelawny quick release tooling (QR) for a wide range of applications
- Optional weight for more aggressive production
- Heavy weight construction but compact for excellent performance with easy manoeuvrability

APPLICATIONS

- Suitable for small and medium jobs
- Fast levelling of high spots
- Removal of coatings and adhesives
- Preparation for new coatings
- Repairing rain damaged concrete
- Polishing of concrete and other materials

Coatings Removal

Grinding Concrete

Use with A22 Dust Collector

INTRODUCTION**

TCG500

500MM TWIN HEAD FLOOR GRINDER

Productivity:
Ave 40 Square
Meters per
hour

-  Low vibration options available
-  Dust control options available

The TCG500 is the workhorse of choice for contractors looking for a reliable, productive floor grinder.

Dual counter rotating grinding heads ensure balanced operation while the flexible disc coupling ensures maximum contact and usage of the diamond while working over rough surfaces.

The additional weight system and flexible tooling allow fine adjustment of performance and make the TCG500 a versatile package for a wide range of applications.

FEATURES

- 500mm grinding width
- Dual dust ports for virtually dust free working
- Available with Trelawny Quick Release tooling (QR) for a wide range of applications
- Additional weights for increased production
- Trelawny Vibro-Lo™ vibration reduction for operator comfort and safety
- Available in a wide range of electric and petrol options

FOR FLOOR GRINDING
INTRODUCTION

HOW THEY WORK

Floor grinders use a horizontal rotating disc to perform a multitude of tasks, commonly fitted with diamonds or other hard abrasives to level, smooth and clean the surface.

Ranging in size from single-disc units for working in small or restricted areas to dual and triple disc machines for high production grinding of large slabs.

All Trelawny machines are equipped with vacuum ports for dust-free dry grinding and include a water attachment for wet grinding options.

APPLICATIONS

Grinders can serve multiple functions and are generally more adaptable than other types of surface prep equipment, especially when it comes to decorative work. They are a good solution for profiling floors before application of thin coatings or paints because they won't create ridges in the surface, where a scarifier will.

Other applications include breaking up deposits of grease, dirt and industrial contaminants and levelling uneven joints or high spots. Many contractors also use grinders with finer-grit abrasives to polish concrete surfaces.

ATTACHMENT OPTIONS

Investing in an assortment of attachments for your grinder will maximize its versatility and allow you to perform a broader range of tasks with one machine.

Trelawny offer a complete range of diamond tooling in various grit levels, ranging from fine to coarse, and with different bond hardnesses, shapes and diamond concentrations, allowing you to match the tool to your project requirements.

Please see page 36 for further information on the Trelawny range of diamond tooling.

HINTS & TIPS

When operating the TCG grinders gently sway the machine from side to side in order to create an even finish.

Consider a different bond of diamond – soft bonds are for hard concrete and hard bonds for soft concrete – If the diamond performance drops off this may be because they have "glazed" meaning the diamonds are less exposed and become ineffective.

For heavy removal more than 2-3mm consider using a scarifier first.

**SURFACING
STRIPPING**

TFS230

230MM FLOOR STRIPPER

Productivity:
Ave 20 Square
Meters per
hour

The most robust floor stripper in its class

The TFS230 is the latest addition to the surface stripping range, developed to suit various applications and withstand rough site use. Its features ensure high performance stripping, easy operation and transportation. The operator's comfort and safety is at the heart of the design.

FEATURES

- Twist & lock height adjust mechanism for optimal angle of attack
- Oscillating blade movement
- Rear Kick Plate for extra "Shove"
- Compact for ease of transport
- Removable Handle
- Front wheels for manoeuvrability

APPLICATIONS

- Removal of linoleum & vinyl floor coverings
- Lifting of carpet tiles
- Scraping of backing adhesives & residues

Linoleum Removal

Removing Tiles

Carpet Removal

LR PNEUMATIC LONG REACH STRIPPER

Available in:
2ft, 4ft, 5ft & 6ft

Check out the
“Lite” versions
for high level
working.

Non spark options available

One tool, multiple applications

The Trelawny long reach stripper range are versatile tools for chipping and scraping tiles, adhesives, screed and vinyl along with many other cleaning and industrial applications.

Available in a range of lengths from 2ft up to 6ft. Long reach tools eliminate the need for manual labour, they are quite literally a back saver!

The aluminium “Lite” version is perfect for jobs that require working overhead or accessing hard to reach areas such as tank cleaning.

Available with a wide selection of chisels and blades, they are perfect for renovation, flooring contractors, roofing, demolition and asbestos abatement.

FEATURES

- Quick change chisel release
- Unique ‘LITE’ range: lightweight models
- Available in 2ft, 4ft, 5ft and 6ft lengths
- Three tools in one: chipping, scraping, descaling
- Requires only 4.5 CFM of air: extremely cost effective, requiring only a small portable compressor
- Perfect tool for equipment hire companies

APPLICATIONS

- Tile removal
- Removal of ice, residues and other adhesives
- Removal of carpet, linoleum
- Chemical spillage removal
- Bituminous products removal

Requires
compressor:
4.5cfm capable

Ceramic Tile Removal

Render Removal

Ship Deck Rust Removal

HOW THEY WORK

The Trelawny surface strippers use an oscillating blade mechanism to effortlessly remove a wide range of materials from concrete, steel and wooden surfaces.

The high RPM of the oscillating blade makes cutting through stubborn material effortless, and eliminates the traditional method of "hammer and chisel" material removal.

Available in both electric and pneumatic options with an array of attachments make these very versatile machines.

APPLICATIONS

Floor Strippers and Long Reach Strippers are used for:

- Carpet & vinyl removal
- Adhesive & rubberised coating removal
- Roofing & bituminous material removal
- Chipping, lifting, cleaning and cutting
- De-scaling steel
- Cleaning and preparing masonry, brick & concrete
- Paint and coating removal

ATTACHMENT OPTIONS

A complete range of attachments are available for the pneumatic long reach scalars that Trelawny offer.

Attachments include:

- Spark resistant aluminium bronze chisels for use in hazardous areas
- Various width chisels to suit specific applications
- Various width scrapers to suit specific applications
- Needle scaler attachment to convert the long reach into a needle scaler in seconds
- Comb inserts for brick cleaning and reclamation

HINTS & TIPS

Electric Floor Stripper

Adjusting the blade pitch allows the operator to position the blade from a shallow angle to a steeper more aggressive cut.

Use the additional weights on tough to remove materials.

Pneumatic Long Reach Strippers

Use the "Long Reach LITE" option when working at heights to increase operator comfort.

Allow the tool to do the work, putting excess pressure on the head will not allow the heads to reach their full extension potentially stalling the tool and reducing performance.

ATEX Certified

Outstanding performance and safety through efficiency was the principle objective behind the design of the VL range of scaling tools.

The Trelawny Vibro Lo™ range of vibration reduced needle and chisel scalars are unrivalled in terms of performance, reliability and reduced levels of harmful vibration.

The design features a unique vibration reduction system lowering vibration levels by 8 times that of conventional needle scalars.

Safety built in as standard.

FEATURES

- Range of sizes for performance
- Pistol grip and in-line configurations
- Optional beryllium copper needles for use in potentially explosive environments
- Low air consumption
- Simple maintenance with no special tools required for reduced downtime
- Available as a needle or chisel scaler for multiple applications

APPLICATIONS

- Removal of coatings, corrosion and other accumulated materials
- Slag removal and stress relieving welds
- Cleaning mixers, formwork and machinery
- Spot repairs
- Cleaning concrete for repair

B/BPG NEEDLE/CHISEL SCALERS

2B INLINE

2BPG PISTOL GRIP

3BPG PISTOL GRIP

Requires
compressor:
3.8lps - 8cfm
capable

Dust control options available

Non spark options available

The Trelawny "B" and "BPG" range of needle and chisel scalers have for many years been the default choice for companies seeking reliable, productive descaling tools.

Proven in the harshest environments on ships and rigs throughout the world, the B/BPG series comprises a range of sizes and configurations to suit many surface preparation tasks.

FEATURES

- Range of sizes for performance and versatility
- Pistol grip and in-line configurations
- Range of needles and consumables
- Optional beryllium copper needles for use in potentially explosive environments
- Low air consumption
- Simple maintenance with no special tools
- Available as a needle or chisel scaler for multiple applications
- Unique design, valveless and oversized piston

APPLICATIONS

- Removal of coatings, corrosion and other accumulated materials
- Slag removal and stress relieving welds
- Cleaning mixers, formwork and machinery
- Spot repairs
- Cleaning concrete for repair

TVS® DUST CONTROL

Low vibration options available

Dust control options available

ATEX Certified

Trelawny Tool & Vacuum system (TVS) Shrouded needle scalers are designed for the dust-free safe removal of hazardous materials such as lead, asbestos and silica dust.

In combination with our K series HEPA dust collectors they form a high performance safety focussed system for hazardous abatement and remediation applications.

FEATURES

- Available in low vibration models and B Series tools
- TVS shrouds are retrofittable to all needle scaler models
- Cuffs for flat, edge, and corner applications
- Adjustable for access
- Low air consumption
- Simple maintenance with no special tools
- Available as a needle or chisel scaler for multiple applications
- Unique design, valveless and oversized piston

APPLICATIONS

- Removal of coatings, corrosion and other accumulated materials
- Slag removal and stress relieving welds
- Cleaning mixers, formwork and machinery
- Spot repairs
- Cleaning concrete for repair

LR LONG REACH NEEDLE/CHISEL SCALER

Available in:
2ft, 4ft, 5ft & 6ft

Check out the
"Lite" versions
for high level
working.

Non spark options available

The Long Reach range is designed to make the operator's life easier when scaling and cleaning hard to reach areas such as tanks.

Available in a range of lengths from 2 ft up to 6 ft, long reach tools are perfect for a wide number of applications.

The aluminium Long Reach "Lite" makes working overhead or while reaching easy, it is quite literally a back saver.

A full range of chipping, scaling and scraping attachments make it an indispensable tool for any structural cleaning operation.

FEATURES

- Range of sizes for performance and versatility
- Steel and aluminium body versions
- Wide range of consumables for multiple applications
- Optional beryllium copper needles for use in potentially explosive environments
- Ergonomic design for operator comfort
- Simple maintenance with no special tools required for reduced downtime

APPLICATIONS

- Removal of coatings, corrosion and other accumulated materials
- Cleaning concrete prior to repair
- Cleaning mixers, formwork and machinery and hard to reach areas

KITS

CHIPPING AND DESCALING

Trelawny's industry leading needle & chisel scalers are available in a versatile, user friendly kit.

Proven in the harshest environments on ships and rigs throughout the world, the kit packages come complete with needle and chisel attachments to suit multiple chipping and scaling applications.

The clever design enables the tools to be converted from needle scalers to chisel scalers in a matter of seconds. Premium models come in a heavy duty carry case.

Safety built in as standard.

FEATURES

- Range of sizes to suit various applications
- Simple maintenance with no special tools required for reduced downtime
- Convert from needle scaler to chisel scaler in seconds. All required parts included in the kit
- Different types of needle and chisel are available to suit various applications
- Pistol grip and in-line configurations available
- Standard and low vibration options available

APPLICATIONS

- Removal of coatings, corrosion and other accumulated materials
- Slag removal and stress relieving welds
- Cleaning steelwork and machinery
- Spot repairs

NEEDLES - A MARK OF EXCELLENCE FROM TRELAWNY

Trelawny offer the highest quality needles proven to last more than 10 times the duration of some competitor needles. Our customers benefit from less needle changes and therefore reduced downtime.

All the Trelawny Needle Scalers are delivered from stock complete with 180mm long x 3mm diameter high performance needles. We also offer spark resistant needles for use in potentially hazardous areas and stainless steel for use in areas where the effect of corrosion from humidity can be a problem such as applications in the food processing industry.

Varying pack sizes are offered to give customers a variety of choices, including bulk needle boxes.

CHISEL TIP NEEDLES

These needles will clean the same material as a pointed tip, but will leave light surface marking.

Image	Part Number	Size (mm)	Description
	453.2110	3mm	Box of 100 Needles
	443.2107	3mm	Box of 1000 Needles

FLAT TIP NEEDLES

The flat tip needles will reduce marking on metal surfaces and can actually give a polishing finish.

For use on thin gauge metals and any surface where a light treatment is required.

2mm needle used on a welded joint produces a similar effect to shot peening, reducing stress in the weld.

Image	Part Number	Size (mm)	Description
	453.1110	3mm	Box of 100 Needles
	443.1107	3mm	Box of 1000 Needles

STAINLESS STEEL NEEDLES

Available in 3mm flat tip form only, to be used in applications such as refurbishment of food processing machinery or areas of high humidity where the corrosive effect on needles would be prohibitive.

Used on decorative concrete surfaces where contamination of the surface from carbon steel needles is undesirable.

Image	Part Number	Size (mm)	Description
	453.1207	3mm	Box of 100 Needles
	443.1207	3mm	Box of 500 Needles

POINTED TIP NEEDLES

Sharpened to a conical point, these are the most effective in breaking through very hard scale on materials where some surface indentation is permissible - or where a roughening or keying of the surface is actually desirable.

Image	Part Number	Size (mm)	Description
	453.3110	3mm	Box of 100 Needles
	443.3107	3mm	Box of 1000 Needles

SPARK RESISTANT
BERYLLIUM COPPER

Available in 3mm flat tip only for use in potentially hazardous areas.

Image	Part Number	Size (mm)	Description
	453.1310	3mm	Box of 100 Needles
	443.1307	3mm	Box of 500 Needles

REPLACEMENT CHISELS - B/BPG

TRIDENT NEPTUNE

Heavy Chipping

Rapid Descaling

Wire Brushing

Productivity:
Ave 5 Square
Meters per
hour

Trelawny's proven reliability over many years has made the trident neptune machines the first choice for de-scaling on board ships.

The Trident Neptune will rapidly remove scale, rust, paint and other unwanted deposits, leaving a good surface suitable for priming, painting and coating applications.

All machines supplied with:

- Flexible shaft 3m x 16mm (9ft x 5/8")
- Heavy duty leaf scaling head
- 6 cutter scaling head
- 150mm dia (6") power brush
- Spanner set
- Hand guard

FEATURES

- 30% lighter than competitor machines for greater portability
- Automatic thermal protection on electric models protects the motor from overheating and prevents costly repairs
- Skid style designed base prevents the machine rolling around on decks
- Multiple cutters and brushes available for a wide variety of removal and finishing applications. IP55 rating

APPLICATIONS

- Removal of paint, rust, scale and other unwanted deposits in difficult to access areas
- Preparation of surfaces for priming, painting and coating

PNEUMATIC ANGLE GRINDERS

VL 5" ANGLE GRINDER

VL 7" ANGLE GRINDER

Low vibration options available

Lightweight, robust and high performing pneumatic angle grinders to suit a wide variety of grinding and cutting applications.

Ideal for smooth detail finishing. Available in 2 sizes, Trelawny pneumatic angle grinders provide a high level of performance for a variety of grinding and cutting applications. When purchased with the brush the tool is ideal for feathering surface rust whilst the disc removes stubborn material deposits.

FEATURES

- Safety trigger
- Rear exhaust*
- 5" & 7" disc grinders
- Alternative low vibration handle available
- Lightweight, ergonomic design
- Spindle lock for fast changing of discs*
- *Available on the Vibro-Lo™ model

APPLICATIONS

- Cutting
- Weld seam cleaning
- Paint & rust removal
- Grinding & polishing
- Descaling & preparation of steel or aluminium surfaces

Ship Deck Paint Removal

Weld Seam Removal

Painting Preparation

SCALE FORCE 5" SPEED DISC 10PCS 5" GENERIC HAND GRINDER FITMENT

Dust control options available

Versatile 5 inch, generic hand grinder fitment, SF Speed Disc. Removes coatings, rust and corrosion in seconds.

This long life consumable is ideal for all areas of industrial and marine applications where years of coating build up needs to be removed without damaging the steel beneath.

Unlike traditional grinding discs the SF Speed Disc flexes under pressure to protect the bare metal from damage.

SCAN HERE
FOR SPEED DISC
PRODUCTIVITY

FEATURES

- Silicone carbide abrasive, synthetic fibre disc
- Open web construction for fast cutting action on all metal surfaces
- Safer than wire bristle tools, with 2x longer life.
- Low vibration solution to fit any hand grinder

APPLICATIONS

- Manual removal of coatings on steel and metal
- Ideal for pre-welding clean up, or post weld spatter finishing
- Dirt & millscale removal and corrosion
- Use as a pre re-coating process with needle scaling where necessary

After 2.85 seconds of grinding

After 12.77 seconds of grinding

After 29.12 seconds of grinding

PPT
HANDHELD SCARIFIER
PEENING PREPARATION TOOL

Productivity:
Ave 5 Square
Meters per
hour

Requires
compressor:
840lpm - 30cfm
capable

Low vibration options available

Dust control options available

The real alternative to small area shot blasting.

Trelawny's Peening Preparation tool (PPT) is designed for applications where open blasting may not be possible or simply as a fast economical way of effectively carrying out surface preparation in small or remote areas. It is ideal for preparing flat or large vertical areas such as beams, girders and tanks.

The PPT fitted with "Rotopeen™" abrasive flaps will remove coatings, scale and corrosion while cleaning the surface to a near white metal finish providing up to a 100 micron anchor profile perfect for reapplication of coatings.

Safety built in as standard.

FEATURES

- Available in 50mm (2") or 100mm (4")
- Range of abrasives available
- Fully shrouded tool (TVS®)
- Star Cutters - aggressive removal of thick coatings
- Beam Cutters - removal of hard coatings, less aggressive than star cutters
- 3M™ Heavy Duty Rotopeen™ 'C' type flap - removal of paint and rust to a bare metal finish

APPLICATIONS

- Fast removal of coatings, scale and contamination including: radioactive waste removal and capture, non-slip coatings, general paint removal, plaster removal, ceiling and wall paint, floor markings, adhesives, sealants and protective coatings.
- Used in many industries including: nuclear, ship decks, construction, factory floors, swimming pools, bridge maintenance and pipelines.
- Suitable alternative to small area blasting.

Steel Application

3M™ Rotopeen Flap Finish

Use with Peening Preparation Tool

SF

SCALEFORCE PNEUMATIC HANDHELD SCALING HAMMERS

**Requires
compressor:
5.2lps - 11cfm
capable**

Low vibration options available

Dust control options available

ATEX options available

Trelawny's SF range of scaling hammers are highly effective for quick removal of heavy scale and coatings.

The SF1/VLSF1 single head tools are perfect for smaller and awkward to reach areas, being lightweight and easy to handle, it's perfect for reaching behind structures and up against bulkheads.

The SF3 three head tools give faster production for more open areas.

Safety built in as standard.

FEATURES

- Option of replaceable carbide tipped scaling heads or economical hardened steel single piece pistons
- Beryllium copper spark resistant heads for use in potentially explosive environments
- Ergonomic handle for ease of use - also available with a short handle and/or inline for tight areas
- Simple and robust design for low and easy maintenance

APPLICATIONS

- Quick removal of heavy coatings and rust
- Preparation before blasting
- Cleaning pipes

Thick Paint Removal

Heavy Duty Descaling

Rust Removal

SF11

SCALEFORCE 11 HEAD

PNEUMATIC DECK HAMMER

Productivity:
Ave 30 Square
Meters per
hour

**Requires
compressor:**
33lbs - 70cfm
capable

Low vibration options available

Dust control options available

ATEX options available

For fast scaling of decks the walk behind SF11 is a fast, effective means of removing hard coatings and corrosion.

11 carbide tipped heads quickly fracture even the toughest materials, perfect for ongoing maintenance or preparation pre blast cleaning to speed up removal and save costs on abrasives.

The floating head design allows the SF11 to easily follow deformations in the surface meaning coatings will be removed evenly and consistently.

Safety built in as standard.

FEATURES

- 11 scaling heads
- Option for replaceable carbide tipped heads or single piece steel pistons
- Optional beryllium copper spark resistant heads for use in potentially explosive environments
- Trelawny Vibro-Lo™ vibration reduction for operator comfort and safety
- Optional Trelawny TVS® vacuum shroud system for protection of operators and surrounding environment
- ATEX model available

APPLICATIONS

- Ship decks, tank tops, bridge decks and floating platform descaling
- Use ahead of grit blasting to break down coatings
- Aggressive pre-preparation on thick coatings ahead of shot blasting

Coating and Corrosion Removal

Large Area Descaling

Use with KAV30 Dust Collector

A22

INDUSTRIAL DUST COLLECTOR

The A22 single phase dust collector is the perfect partner for our smaller range of single phase grinders and scarifiers.

The A22 is the ultimate compact unit for surface preparation machines and general cleaning applications.

The standard Class M filter offers exceptional surface area and filtration, the optional HEPA filter is classified to the highest rating H14.

The A22 features the ENDLESSBAG safe bagging system for easy containment and disposal of material.

Now fitted with a new reverse pulse filter cleaning system ensuring continuous reliable performance under the hardest conditions.

FEATURES

- 100% steel construction for long service life
- Two motors
- Class M primary filter with optional HEPA filter
- Complete with 40mm tool kit
- Reverse pulse filter cleaning system for performance and long service.
- Low noise level
- ENDLESSBAG option available

APPLICATIONS

- Perfect partner for smaller surface preparation equipment such as TFP200 scarifier, TCG hand grinders and TCG250 single head grinder
- Also ideal for use with many other smaller types of construction equipment with options for dust extraction
- General cleaning of fine dust in many other industries

Use with TFP200 Floor Scarifier

ENDLESSBAG Bag System

Use With TCG250 Floor Grinder

A45 INDUSTRIAL DUST COLLECTOR

The A45 is a real over performer in its segment.

For a single phase dust collector, the A45 can compete with much larger machines.

Fitted with 3 motors, producing a total of 3.5Kw, it is the ideal machine for a wide range of Trelawny's surface preparation equipment along with many other general cleaning applications.

Full steel construction ensures the A45 stands up to the toughest site conditions.

Filtration is provided by a standard M class primary star filter offering an outstanding surface area of 3m² perfect for collection of large quantities of fine dust. The optional HEPA* filter is classified to H14 giving 99.995% efficiency at 0.18 micron.

Available with either a detachable, portable bin or the ENDLESSBAG safe bagging system.

FEATURES

- High filtration and efficiency Class M primary filter with optional H14 HEPA filter
- Mechanical filter cleaning mechanism with filter clogging indicator to ensure optimum performance
- Three powerful single phase motors for performance and usability
- Detachable bin or ENDLESSBAG containment options
- Complete with 50mm tool kit

APPLICATIONS

- Perfect partner for small and medium sized surface preparation equipment such as TFP200 & TFP260 scarifiers, TCG250 and TCG500 grinders
- Also ideal for use with many other types of construction equipment with options for dust extraction
- General cleaning of fine dust in many other industries

Use with TFP Floor Planers

Use with MHS Floor Scabblers

Use with TCG Floor Grinders

*Machines supplied with HEPA as standard are classified to Type H and are provided with a certificate to certify the complete machine.

A70

INDUSTRIAL DUST COLLECTOR

The A70 is perfectly suited to larger surface preparation equipment and heavy duty applications.

Featuring a 24/7 continuous duty maintenance free motor it is ideally suited to large jobs where constant running and reliability is a priority.

Filtration is provided via primary M class star filter offering 30,000 cm² of filter surface area. The secondary HEPA filter is classified to H14 and offers an additional 45,000 cm² of filter surface area.

The primary filter is cleaned via a mechanical filter cleaning mechanism with a suction indicator to alert to a clogged filter ensuring reliable running.

Supplied as standard with the ENDLESSBAG safe bagging system.

FEATURES

- 100% steel construction for longer service life.
- 3 phase side channel motor for 24/7 continuous duty operation
- Class M primary filter with optional HEPA filter offering large filter surface area
- Efficient mechanical filter cleaning system for high performance and long service life
- ENDLESSBAG collection system
- Complete with 50mm tool kit

APPLICATIONS

- Perfect partner for larger 3 phase surface preparation equipment such as TFP320 scarifier, TPG540 & TPG650 grinders
- Also ideal for use with many other types of construction equipment with options for dust extraction
- General cleaning of fine dust in many other industries

Use with Large Floor Machines

Use Longpac Bags

Dust-free working

KAV30

SERIES K ATEX APPROVED PNEUMATIC VACUUMS

ATEX options available

The KAV30 is ATEX approved for Gas Zone 1 and Dust Zone 21 under category 2 of the ATEX directive.

The K series range of industrial dust collectors form an integral part of Trelawny TVS® (Tool and Vacuum System).

Uniquely available with a fully conductive accessory kit, stainless steel canisters mounted on a stainless steel caddy fitted with conductive braked castors and wheels. Each machine is issued with an earth path continuity certificate and where applicable the Type H versions include a filtration test certificate.

The K series range of industrial dust collector form an integral part of Trelawny's TVS®, Tool and Vacuum System, for our range of smaller hand held surface preparation equipment.

FEATURES

- 30 litre capacity
- ATEX certified with certificate
- Optional certified type H version
- Supplied with conductive tool kit
- Optional wet use version

APPLICATIONS

- Suitable for use with Trelawny's TVS® range of handheld scaling tools
- Collection of dust in hazardous environments categorised under category 2 of the ATEX directive
- Collection of dry dust and wet materials

Use with SF11

Use with Needle Scalars

Use with Peening Preparation Tool

Dry models complete with:

- 38mm Tool kit (Part No. 303.1085/AS)
- 14" Standard filter assembly (Part No. 303.1025/AS)
- 5 x K4 Microfibre bags (Part No. 303.1003)

Wet & Dry models complete with:

- 38mm Tool kit (Part No. 303.1095/AS)
- 14" Antistatic Float Assembly (Part No. 303.1050/AS)
- 14" Standard filter assembly (Part No. 303.1025/AS)
- 5 x K4 Microfibre bags (Part No. 303.1003)

Dry Type H models complete with:

- 38mm Tool kit (Part No. 303.1085/AS)
- 14" Standard filter assembly (Part No. 303.1025/AS)
- 5 x K4 Microfibre bags (Part No. 303.1003)
- HEPA Filter (Part No. 303.1060)

Trelawny recommends an optimum air pressure of 6 bar for maximum efficiency.

** ATEX Directive 99/92/EC - referring to health and safety of workers that might be at risk from explosive atmospheres. Classifies hazardous areas into zones which for dust range from zone 20 (combustible dust present continuously or for long periods); through zone 21 (combustible dust likely occasionally) to zone 22 (combustible dust not likely to occur, or for a short period).

** ATEX approved vacuums for use in gas zone 1 and dust zone 21 are available, please ask our sales team for details

** It is the end user responsibility to ensure & maintain a good earth bond at the air connection point

** HEPA - High Efficiency Particulate Air - filter for collection of hazardous dust

KEY CONSUMABLES & ACCESSORIES

The Trelawny range of vacuums are designed to work in partnership with our full range of machines to provide a dust-free working environment. The below chart matches the specific Trelawny machine with the most compatible vacuum. This is based on both performance of the vacuum and the vacuum cost in relation to the machine.

- Key to the guide:
- ★★★★ Most suitable combination.
 - ★★ Satisfactory combination.
 - ★ Least satisfactory combination.
 - Not compatible.

				
	Series K Pneumatic	A22 Vacuum	A45 Vacuum	A70 Vacuum
Hand Scabblers	★★★★	★★		
MHS11 Floor Scabbler	★★	★★	★★★★	★★

AIR TOOL ACCESSORIES

A full range of complimentary accessories are available, including air hoses, lubricators and connectors.

Compressed air tools and hoses working under pressure can pose a serious risk if adequate safety measures are not implemented and followed. Trelawny always advise using high quality air fittings and accessories, ensure regular maintenance is carried out as per the tools operation and maintenance manual and adhere to specified pressure given in the technical data sheet.

AIR HOSES

Image	Trelawny Part No.	Description
	843.0752	Air Hose Consists of ¾" air hose with claw couplings - 15m
	719.3000	Air Hose ¾" Bore - 30m
	421.3450	Air Hose Consists of air hose, ¼" BSP male coupling, claw coupling - 2m
	421.3452	Air Hose Consists of air hose ¾" BSP male coupling, claw coupling - 2m

CONNECTORS

Image	Trelawny Part No.	Description
	819.2375	¼" BSP - ¾" Stem Connector
	819.0385	¾" BSP - ¾" Stem Connector
	843.0770	½" BSP Claw Coupling Female
	843.0775	¾" BSP Claw Coupling Male
	819.0380	¾" Hose Tail with Claw Coupling
	819.5336	¾" Hose Tail with Schrader Connector Male
	819.5333	¼" BSP Schrader Connector Male
	819.5334	¼" BSP Schrader Snap Connector Female
	821.0625	¾" Hose Clips

LUBRICATORS

Image	Trelawny Part No.	Description
	8591530	¼" BSP Inline lubricator
	8591555	½" BSP Inline lubricator
	8591580	¾" BSP Inline lubricator

LUBRICATOR ASSEMBLIES

Image	Trelawny Part No.	Description
	4581530	¼" Whip Hose & Oiler Assembly Consists of of whip hose, and ¼" lubricator
	4581555	½" Whip Hose & Oiler Assembly Consists of of whip hose, whip check and ½" lubricator
	4581580	¾" Whip Hose & Oiler Assembly Consists of of whip hose, whip check and ¾" lubricator

WHIP CHECKS

Image	Trelawny Part No.	Description
	8155550	Safety Whip Check ½" - 1¼"
	8155560	Safety Whip Check 1½" - 3"

PPE KIT

Image	Trelawny Part No.	Description
	4467002	Trelawny PPE Kit Consists of: High vis jacket, safety gloves, safety glasses & ear plugs

AIR PRESSURE INFORMATION

Pressure is the pushing force or power which drives the tool. Correct air pressure is very important, too low and the tool will not perform at its maximum, too high, wear and damage to the tool will dramatically increase and at worst can lead to a potentially deadly failure or accident!

Air pressure is commonly measured in:

- PSI (Pounds per Square Inch)
- BAR

Air Consumption is the amount of compressed air the tool will use (at the manufacture's specified pressure)

Air consumption is commonly measured in:

- CFM (Cubic Feet per minute)
- LPM (Litres per minute)
- LPS (Litres per second)

Conversions:

- 1 BAR = 14.5 PSI
- 1 CFM = 28.32 LPM or 0.47 LPS

AIR PRESSURE NOTES

FAD (Free air Delivery)
When selecting compressor size the output should always be measured as the FAD rating of the compressor. This is the actual volume of air (in CFM, LPM, LPS) discharged by the compressor therefore a more accurate measure of the air available to use.

Displacement
Is the theoretical volume of a compressor also measured in CFM, it should not be used as a basis for selecting a compressors ability to run a tool.

Pressure vs consumption
Ensure your compressor can output the required air at the specified pressure. Pressure and consumption are not the same thing!

Tank size
Many people mistakenly look at the tank capacity (in litres) of a compressor as the main criteria for running a piece of equipment. Tank capacity is purely for storage and to reduce the running of the compressor motor. The compressors FAD measured in CFM is the critical criteria to determine whether it will run a specified piece of equipment.

AIR COMPRESSOR REQUIREMENTS

Tool / Machine	Cubic Feet Per Minute (CFM)	Litres Per Minute (LPM)	Litres Per Second (LPS)
Single head scabblers	6.5	186	0.18
Three headed scabblers	15	408	0.42
Pole scabblers/tampers	25	708	0.7
PPT pneumatic hand scarifiers	30	840	0.84
MHS11 floor scabbler	55	1560	1.54
TFP pneumatic floor scarifier	170	4956	4.76
Needle / Chisel Scalars (B/BPG)	3 - 8	85 - 227	142 - 3.8
Low Vibration Needle / Chisel Scalars (VL)	4.0 - 5.5	113 - 156	1.89 - 2.6
Long Reach Scalars (LRS)	4.5	127	2.12
Air Hammers (M13)	8.5	241	4.0
Hand Held Scalars (PPT)	30	850	141
Handheld Scaling Hammers (SF)	7 - 11	198 - 312	3.29 - 5.17
Angle Grinders	8 - 10	227 - 283	3.8 - 4.7
Deck Hammer (SF11)	70	1,982	32.9
Trident Neptune Deck Scaler (TN)	68	1,926	31.96
Hydraflex Hold Cleaner (HY)	70	1,982	32.9
Vacuums	35	991	16.45

Consumption figures quoted in this brochure are always quoted at 90 PSI (6.2 BAR) Standard operating pressure for all Trelawny tools.

VINYL WRAPPING

BESPOKE VINYL WRAPPING

Brand your Trelawny product in your own unique colours and messaging, by taking advantage of our vinyl wrapping service. Trelawny's 2021 floor machines offer the option for you to brand your machine however you'd like. Stand out by using our vinyl wrap service to promote your brand and cross sell other products in your range.

We'll design your machine and work with you to include all elements available, the options are endless!

EXAMPLE:

Get in touch to see a visual render of your company branding on our machines, or contact our sales team for further information.
